USER MANUAL

This user manual offers a step-by-step guide on how to make use of the Smart Mirror system!

TIPS AND GUIDELINES

1. Ensure that both the Android device and the Raspberry Pi are connected to the same Wi-Fi network.

2. Use clear voice input for better speech-to-text accuracy.

3. Place the mirror in a visible location for easy viewing of tasks

4. Keeping the space clear ensures that the ultrasonic sensor accurately detects user presence without interference.
